Designers and Makers of Waterless, Self-Contained Composting Toilets

Jason Kass - President & Founder
jason@toiletsforpeople.com
How I Got Into the Toilet Business
Developing World (Wood Exterior)
Version #1 was without urine diversion
Material costs is $100
Portable
Fixable (Sustainable) using local materials and labor
Before and After (Pit Latrine vs Composting Toilet)
Version #1: The CRAPPER

The advantages of a curated, open source platform to TfP are:
✓ Marketability to NGOs
✓ Ability to scale worldwide
Sustainability through in-country repairability using local materials

• Create a consistent, predictable revenue stream to be financially sustainable as an organization

• Provide a product to people in the USA looking for a more ecological toilet which is resilient to climate change (flooding)

• Need for a product that is competitive in function and price with the existing market leaders: Sunmar, Nature’s Head and Separatt

• Help Villages in Vermont overcome septic failures which are leading to rural sprawl and abandonment of the community centers and gathering places.
Separatt ($1089)
Nature’s Head ($960)
5-Gallon Bucket Toilet ($395)
